

Sports

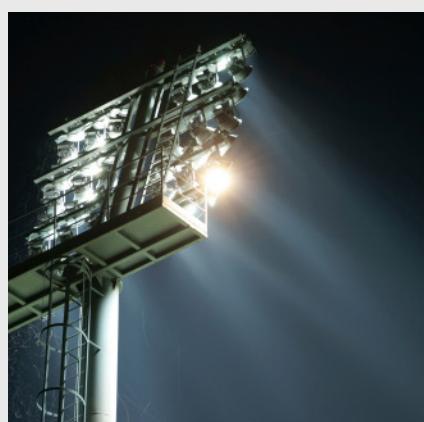

**Innovative lighting solutions
for the places where we live,
work and play.**

At Lamp Source Project Solutions, we deliver high-performance lighting solutions designed to meet the demanding requirements of modern sports facilities.

From local playing fields and school pitches to professional stadiums, our systems ensure precision illumination, energy efficiency, and compliance with UK sports governing body standards (CIBSE LG4 & EN 12193).

**We provide end-to-end support –
from lighting design and product
specification to installation
guidance and commissioning –
ensuring every project achieves
exceptional visibility, player
safety, and spectator experience
under any conditions.**

Great sports lighting improves visibility, safety, and performance - for players, officials, spectators, and cameras.

Whether you're upgrading existing floodlights or designing a new facility, Lamp Source Project Solutions helps you deliver lighting that's efficient, compliant, and built to last.

Energy Saving Lighting

The Regor 11 Sport consumes 50% less energy compared to the metal halide versions it replaces.

Key Considerations

Uniformity over “brightness”

It's not just about being bright - it's about being evenly lit to support safe, high-quality play.

Glare control

Correct optics and aiming are essential to reduce glare for players, spectators, and neighbouring properties.

Flicker-free performance

Low-flicker lighting supports fast-moving sports and improves video/streaming quality.

Durability & maintenance planning

Outdoor sports lighting must withstand harsh conditions and be practical to maintain over time.

Controls for flexibility and savings

Dimming, zoning and scene settings can cut energy use while keeping lighting fit for purpose.

What We Deliver

A well-designed sports lighting system should provide:

- > Consistent illumination across the full playing area
- > High uniformity to reduce shadows and dark spots
- > Low glare for player comfort and spectator experience
- > Reliable performance in all weather conditions
- > Energy efficiency to reduce running costs
- > Smart control options for training, matchday, and events

How We Can Help

We support your project from start to finish with:

- > Lighting design & specification support
- > High-performance LED sports lighting supply
- > Guidance on glare, spill light & uniformity
- > Smart controls for energy savings
- > Project support for contractors and facility teams

Lets Talk.
